Before (9.14.2010)

After (4.20.2011)

Hello, my name is...

Ron Stone 71/m

What first brought me to chiropractic was...

Pain in my lower back

Since starting my chiropractic care plan, my life has been impacted in the following ways...

Increased energy and better, overall health!

Here's what I think others should know about Dimensional Family Wellness and Chiropractic in general...

I would recommend that everyone should have periodic chiropractic exams, in addition to the regular routine health exams. While one may feel in excellent health, there could be underlying conditions which could affect one's health later in life, which may be missed by typical health screenings.

I have been extremely pleased with the care and service I have received at Dimensional Family Wellness

Dr. Note

Ron's neck posture has moved back 31mm, increased 7 degrees in his atlas/occipital angle, increased over 12 degrees in his cervical spine and increased over 2 to 4mm in disc height around C2-C5. This is the power of Chiropractic!
